inder initially); see Boresi and Chong (2000). I I Material Response Data For a cylinder made of isotropic linearly elastic material, the material response data are represented by the results of tests required to determine the elastic constants (modulus of elasticity E and Poisson's ratio ν) and the

coefficient of linear thermal expansion α . To

Advanced Mechanics of Materials P.Boresi(6th edition)

New examples for various types of member and a large number of new problems are included. To facilitate the transition from elementary mechanics of materials to advanced topics, a review of the elements of mechanics of materials is presented along with appropriate examples and problems.
