These are simple experiments, accessible to even reluctant or intimidated science students. This book is similar in scope and content to Robert Gardner's Kitchen Chemistry (Messner, 1982). Although Kitchen Chemistry has projects more complex and varied, the format of Adventures with Atoms and Molecules makes its experiments easier to read and ...

**Adventures with Atoms and Molecules, Bk. I: Chemistry ...**

Atoms combine and bond to each other to make molecules. A molecule is made up of a certain number and type of atom. For example, water ( $H_2O$ ) is always made from two hydrogen atoms and one oxygen atom. All water molecules have this combination of atoms. A molecule has characteristics that are different from the atoms that make it up.
