In production, research, retail, and accounting, a cost is the value of money that has been used up to produce something or deliver a service, and hence is not available for use anymore. In business, the cost may be one of acquisition, in which case the amount of money expended to acquire it is counted as cost. In this case, money is the input that is gone in order to acquire the thing.

### **Cost - Wikipedia**

Cost accounting aids in decision-making by helping a company's management evaluate its costs. There are various types of costs that need to be monitored for a company to be profitable.
