Molecular Masses from Chemical Formulas. For ionic compounds, the term formula mass or formula weight is used instead, since there aren't really any molecules present. The molecular/formula mass is numerically equal to the mass of one mole of the substance.

Formulas and Nomenclature of Ionic and Covalent Compounds

Naming simple compounds. Binary ionic compounds are composed of two elements. The first element is a metal. The second element is a non metal. An "ide" suffix is used to indicate that compound has been formed between the elements. Chemical Formula of Binary Ionic Compounds. Chemical formula. Metal element.
