Earth is the third planet from the Sun, and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite. Earth orbits around the Sun in 365.26 days, a period known as an Earth year.

WHAT DRIVES THE WATER . CYCLE? The sun provides the heat energy necessary to cause water on earth to change states and move through the water cycle.

The Water Cycle

Please review the FAQs and contact us if you find a problem. Credits: 1 Prerequisites: Pre-algebra, I kept most math out of the course, but it comes up in a few places. Recommended: 9th or 10th Test Prep: This course does not correlate well with any one test. It covers some topics on the AP...

Earth Science with Lab - Easy Peasy All-in-One High School

Google Earth is a computer program that renders a 3D representation of Earth based primarily on satellite imagery. The program maps the Earth by superimposing satellite images, aerial photography, and GIS data onto a 3D globe, allowing users to see cities and landscapes from various angles. Users can explore the globe by entering addresses and coordinates, or by using a keyboard or mouse.
