How do greenhouse gases affect the climate? Explore the atmosphere during the ice age and today. What happens when you add clouds? Change the greenhouse gas concentration and see how the temperature changes. Then compare to the effect of glass panes. Zoom in and see how light interacts with molecules. Do all atmospheric gases contribute to the greenhouse effect?

Preface to the Home Education Series. The educational outlook is rather misty and depressing both at home and abroad. That science should be a staple of education, that the teaching of Latin, of modern languages, of mathematics, must be reformed, that nature and handicrafts should be pressed into service for the training of the eye and hand, that boys and girls must learn to write English and ...

In the mature stage of a thunderstorm, the warmed air continues to rise until it reaches an area of warmer air and can rise no farther. Often this 'cap' is the tropopause. The air is instead forced to spread out, giving the storm a characteristic anvil shape. The resulting cloud is called cumulonimbus incus. The water droplets coalesce into larger and heavier droplets and freeze to become ice ...
