Education reform is the name given to the goal of changing public education. Historically, reforms have taken different forms because the motivations of reformers have differed. However, since the 1980s, education reform has been focused on changing the existing system from one focused on inputs to one focused on outputs (i.e., student achievement).

The chapter outlines a general model of intrinsic and extrinsic motivation, the Hierarchical model. This model serves two objectives. First, the model provides a framework to organize the literature on intrinsic and extrinsic motivation, as well as to identify the psychological mechanisms underlying motivational changes.

As the delta-V for a mission goes up, the amount of propellant required goes up exponentially (or looking at it another way: the amount of payload shrinks exponentially). Large amounts of propellant are expensive, but the higher the mass-ratio the higher the likelihood that the spacecraft will not be reusable.

ACUTE Grief is a type of stress reaction, a highly personal and subjective response to a real, perceived, or anticipated loss. Grief reactions may occur in any loss situation, whether the loss is physical or tangible—such as a death, significant injury, or loss of property—or symbolic and intangible, such as the loss of a dream.
