### **Hitachi ShadowImage® User Guide for VSP G series and F series**

When I started working with modern HDS storage systems such as the VSP and HUSVM, I became familiar with the remote replication abilities present on these systems. Similar to my last entry on NetApp's SnapMirror and SnapVault replication abilities, HDS storage has a few choices for remote replication that go by different names. In particular, [...]

### **Understanding HDS Replication with TrueCopy and Universal ...**

Never - Most common setting for the fence level in a synchronous configuration. The P-VOL will never be fenced, or will never deny access to the host, regardless of the condition of the pairs.

Therefore the P-VOL is always available to the host even if all TrueCopy software operations fail.
