### **Ms Excel 2007 Multiple Choice**

Good morning everyone. I'm using Excel 2010. I need to set a cell with multiple choices. For example, if the column header is "choice" must exist in the cell the ability to choose A, B, C or D, enabling the user to make even more of a choice. I remember that long ago was an example posted in the forum, but I could not find it. Thank you for your help.

I have a GetOpenFilename with MultiSelect:=True which works perfectly if it is the only module in my Excel work book. But If I copy the exact same code (CTRL/A - CTRL/C) to an empty module (CTRL/V) in a file which has a heap of other code then it refuses to do the multislect but will only return a single file.
