Education and Plato's Parable of the Cave. Originally appeared in Journal of Education 178/3, 1996.. Everyone knows that Plato is deeply interested in education. In one way or another, nearly all of his dialogues are concerned with it -- what it can accomplish and how it can accomplish it, who is qualified to impart and receive it, why it is valuable, and so forth.

The Republic (Greek: Πολιτεία, Politeia; Latin: Res Publica) is a Socratic dialogue, written by Plato around 380 BC, concerning justice (δικαιοσύνη), the order and character of the just city-state, and the just man. It is Plato's best-known work, and has proven to be one of the world's most influential works of philosophy and political theory, both intellectually and ...

The Platonic solids, also called the regular solids or regular polyhedra, are convex polyhedra with equivalent faces composed of congruent convex regular polygons. There are exactly five such solids (Steinhaus 1999, pp. 252-256): the cube, dodecahedron, icosahedron, octahedron, and tetrahedron, as was proved by Euclid in the last proposition of the Elements.

In antiquity, geometric constructions of figures and lengths were restricted to the use of only a straightedge and compass (or in Plato's case, a compass only; a technique now called a Mascheroni construction). Although the term "ruler" is sometimes used instead of "straightedge," the Greek prescription prohibited markings that could be used to make measurements.

If you want to round, the rounding always comes at the end. If you don't do this, you get rounding errors. Also, since the bottom one has only one significant digit, that means that your answer would actually be 10 cm, instead of 11.9 cm (which, if you're going off of all of the lengths and angles besides the bottom one, is still not rounded well.
