5.2.1. Identifiers (Names)¶ An identifier occurring as an atom is a name. See section Identifiers and keywords for lexical definition and section Naming and binding for documentation of naming and binding.. When the name is bound to an object, evaluation of the atom yields that object.

5. Expressions — Python 2.7.16 documentation

In economics, a production function gives the technological relation between quantities of physical inputs and quantities of output of goods. The production function is one of the key concepts of mainstream neoclassical theories, used to define marginal product and to distinguish allocative efficiency, a key focus of economics. One important purpose of the production function is to address ...
