Repressed Memories. T WOULD be hard to imagine a more lively debate about psychology—filled as it is with accusations, counter-accusations, and downright insults—than the controversy about so-called “repressed” memories. The debate centers on whether or not traumatic experiences can be repressed out of conscious awareness and then later recalled, either spontaneously or through ...

Experimental methods are those in which the researcher controls and manipulates the variables of interests and takes measures of the results. This is the most scientific form of research, but experimental research can be difficult when studying aspects of personality such as motivations, emotions, and drives. These ideas are internal, abstract, and can be difficult to measure.

Theories and Terminology of Personality Psychology

Social psychology is the scientific study of how people's thoughts, feelings and behaviors are influenced by the actual, imagined or implied presence of others. In this definition, scientific refers to the empirical investigation using the scientific method. The terms thoughts, feelings and behavior refer to psychological variables that can be measured in humans.
