The Human Reproductive System, Part 1 - CPALMS.org

Human Reproductive System. The primary function of the reproductive system is to produce male and female sex cells and to ensure the growth and development of offspring. The reproductive system is comprised of male and female reproductive organs and structures. The growth and activity of these organs and structures is regulated by hormones.

Human Reproductive System - ThoughtCo

The development of the reproductive system is a part of prenatal development, and concerns the sex organs. It is a part of the stages of sexual differentiation. Because its location, to a large extent, overlaps the urinary system, the development of them can also be described together as the development of the urinary and reproductive organs.

Development of the reproductive system - Wikipedia

The Human Reproductive System. This scanning electron microscope image enlarges human sperm cells on a human egg cell thousands of times. You will read in this chapter that after one sperm cell enters an egg cell, other sperm cells cannot. -V□i□Viêê-V□i□Viêê+PVSOBM Imagine that you are a sperm cell entering an egg cell.
