## **Study Guide Section 2 Terrestrial**

**FORCES** . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.

The giraffe (*Giraffa*) is a genus of African even-toed ungulate mammals, the tallest living terrestrial animals and the largest ruminants. Taxonomic classifications of one to eight extant giraffe species have been described, based upon research into the mitochondrial and nuclear DNA, as well as morphological measurements of *Giraffa*, but the International Union for Conservation of Nature ...

The family Anatidae was introduced by the English zoologist William Elford Leach in a guide to the contents of the British Museum published in 1820. While the status of the Anatidae as a family is straightforward, and which species properly belong to it is little debated, the relationships of the different tribes and subfamilies within it are poorly understood.

What It Is. Brachycephalic airway obstruction syndrome (BAOS) \* is characterized by primary and secondary upper respiratory tract abnormalities, which may result in significant upper airway obstruction. BAOS is an inherited condition in the cavalier King Charles spaniel. The breed is predisposed to it, due to the comparatively short length of the cavalier's head and a compressed upper jaw \*\*.

The use of laboratory animals is governed by an interrelated, dynamic system of regulations, policies, guidelines, and procedures. The Guide takes into consideration regulatory requirements relevant to many US-based activities, including the Animal Welfare Regulations (USDA 1985; US Code, 42 USC § 289d) and the Public Health Service Policy on Humane Care and Use of Laboratory Animals (PHS 2002).
