If you have installed node.js with apt-get install nodejs then it is simply node.. STEPS : Install node.js through apt-get install nodejs. write aptitude search 'nodejs' on terminal. If aptitude not installed then write sudo apt-get install aptitude to install aptitude. Then again write aptitude search 'nodejs' on terminal.. i nodejs shows next to it. It means that you have successfully installed.

ubuntu 10.04 - How to open Node.js command prompt? - Super ...

After installing a program using a package manager where is the information about where the program was installed and in which menu category it can be found.

installation - Find where a program is installed in Linux ...

The command to have Ubuntu fix unmet dependencies and broken packages is . sudo apt-get install -f from the man page:-f, --fix-broken Fix; attempt to correct a system with broken dependencies in place.

How do I resolve `The following packages have unmet ...

You can also set the environment variable LESS. I use LESS=-Ri, so that I can pump colorized output from grep into it, and maintain the ANSI colour sequences.. Another little used feature of less that I found is starting it with +F as an argument (or hitting SHIFT+F while in less). This causes it to follow the file you've opened, in the same way that tail -f <file> will.

unix - How do you do a case insensitive search using a ...
