SC.7.L.16.1 : Understand and explain that every organism requires a set of instructions that specifies its traits, that this hereditary information (DNA) contains genes located in the chromosomes of each cell, and that heredity is the passage of these instructions from one generation to another.

Build-A-Baby - CPALMS

When looking at the model of inheritance which the Punnett Square illustrates (referred to as Mendelian inheritance), you are observing combinations of dominant alleles and recessive alleles. An allele is a version of a gene (the eye color gene can consist of blue, brown, green, gray, and hazel alleles). Dominant genes mask recessive genes. For example, brown eyes are the dominant gene for eye ...
